## Deschutes II

One of Oregon's favorite rivers for white-water rafting, the Deschutes originates from a small 130-acre lake high in the Cascade Mountains called Little Lava. This beautiful river winds through 250 miles of eastern Oregon before it joins the mighty Columbia. The lower Deschutes is renowned for a magnificent desert canyon brimming with sage brush, favored by osprey and offering awe-inspiring natural sculptures in basalt rock—not to mention exciting rapids!
