Skagit II (1202-0 C)
Board/Batten and Shingles with Dual Columns

Skagit II

The 160-mile Skagit River originates in Canada and flows through the North Cascade Range. It's the only river system in Washington State that is home to all five species of salmon. Bald eagles, bear, wolves, trumpeter swans and a variety of migrant birds frequent its banks and shallows. July through August, the Upper Skagit River is a family favorite for river rafting due to its easy, gentle current and stunning views. The Upper Skagit winds through the North Cascades National Park near Ross Lake, which makes it handy to Seattle.

Skagit II (1202-0 B)
Shingles with Round Column
