Willamette II (1200-0 C)
Lap Siding with Dutch Colonial Roof

Willamette II

The picturesque Willamette is the only major Western river that flows from the north to the south. One of the tributaries of the Columbia River, the Willamette helps the Columbia drain a 259,000 square mile glacial basin that includes seven states—Washington, Oregon, Idaho, Montana, Nevada, Wyoming and Utah. The Willamette flows through Portland, providing a wide variety of activities and picturesque “photo opps” for tourists. One of the most popular cruises on the Willamette highlights the fascinating history and adventures of Lewis and Clark.
